

## Create a basic digital scrapbooking layout from scratch using Photoshop Elements

In this tutorial I show you how to create a basic digital scrapbooking layout in Photoshop Elements. You learn to drag and drop elements and papers from your project bin into the layout, arranging elements, adjusting photos and adding drop shadows. Something to get you started.

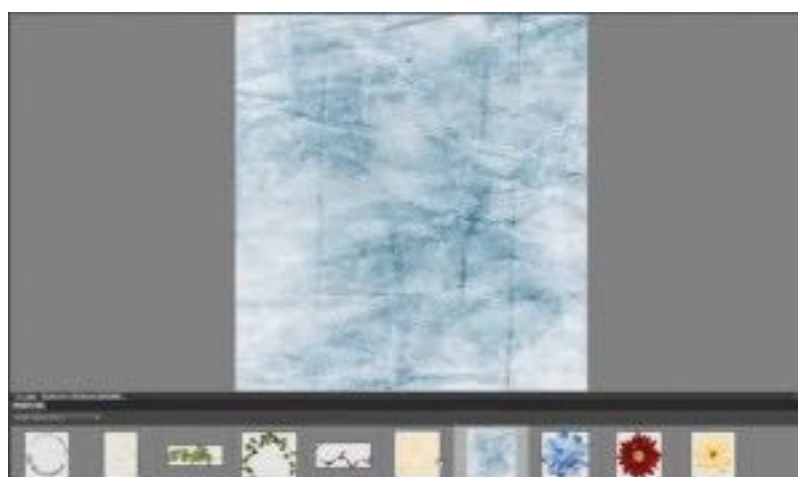

### Why do you want to create a digital scrapbooking layout?

- digital scrapbooking is traditional scrapbooking without the mess
- digital scrapbooking is much cheaper than traditional scrapbooking
- you can be even more creative with scrapbooking digital scrapbooking layouts (e.g. blending techniques or creating reflections)
- digital scrapbooking is much cheaper
- you can use one element 100 times if you wish in your digital scrapbooking layouts
- you can press the undo button if you did something wrong!

### What do you need to create a digital scrapbooking layout?

- a digital scrapbooking kit (you get a gorgeous Megakit FREE with newsletter signup! Have a look at Natural Breeze here)
- an image editing program – in our tutorials we use Photoshop Elements, you can get a free trial on the Adobe Website
- photos you want to use in your digital scrapbooking layout That's it!
