

Create a calendar using Photoshop Elements – Digital Scrapbooking Tutorials

Please note: the tutorials are much easier to understand when you watch the video, especially if you are just starting out the written tutorial won't help you to create the wished effect.

1. Open your pictures and elements/background(s) you want to use. They show up in your project bin on the bottom.

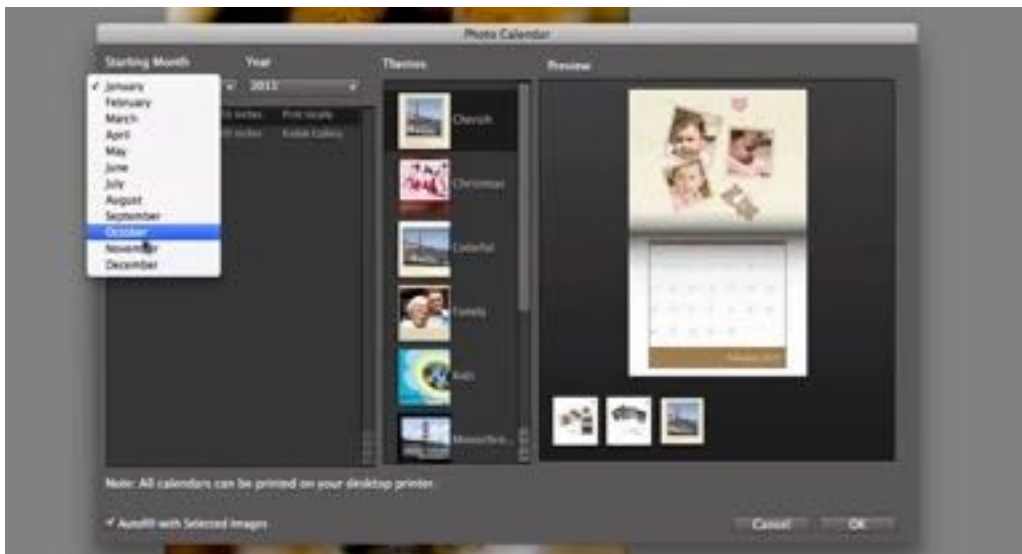

2.

3. Click on the Photocalendar Tab.

4. Choose a layout for your calendar.

5.

6. Place your photos on the Calendar.

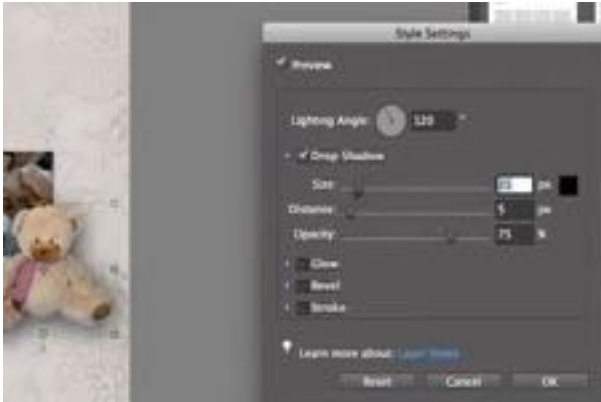

7. Place your background behind the pictures.

8. Place elements on your page.

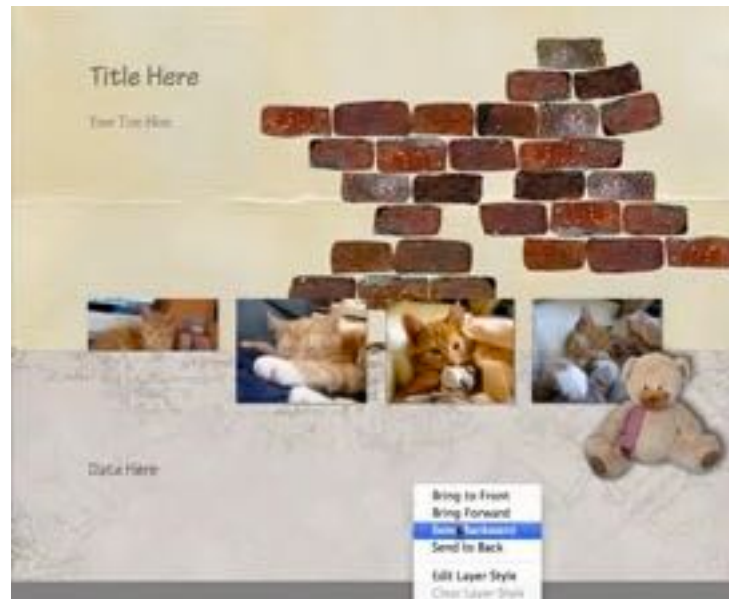

9. Add shadows.

10.

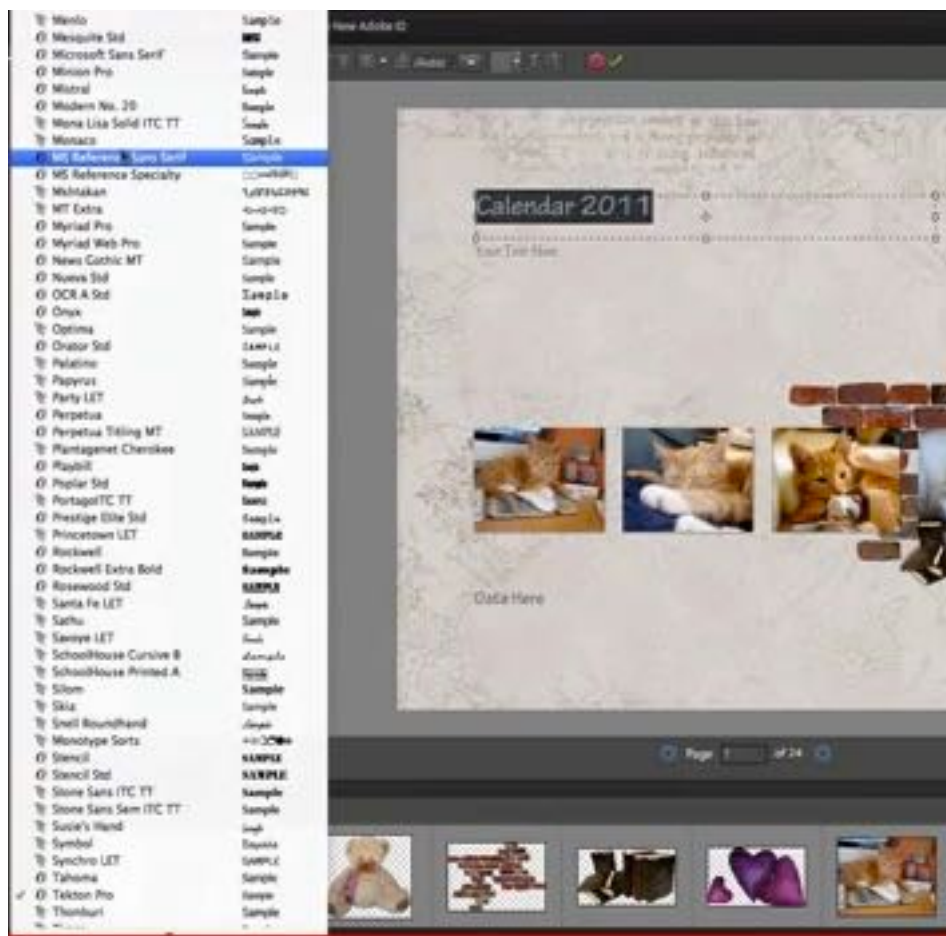

11.

12. Add a title to the page.

13. Choose the font you wish.

14. Your calendar page is ready!
