

# Create an out of the Bounds effect using Photoshop Elements – Digital Scrapbooking Tutorials

In this tutorial you learn to create the fun out of the bounds effects in the guided effects panel in Photoshop Elements. It's fun and so easy to create.

Please note: the tutorials are much easier to understand when you watch the video, especially if you are just starting out the written tutorial won't help you to create the wished effect.

## 1. Open a picture in Photoshop Elements

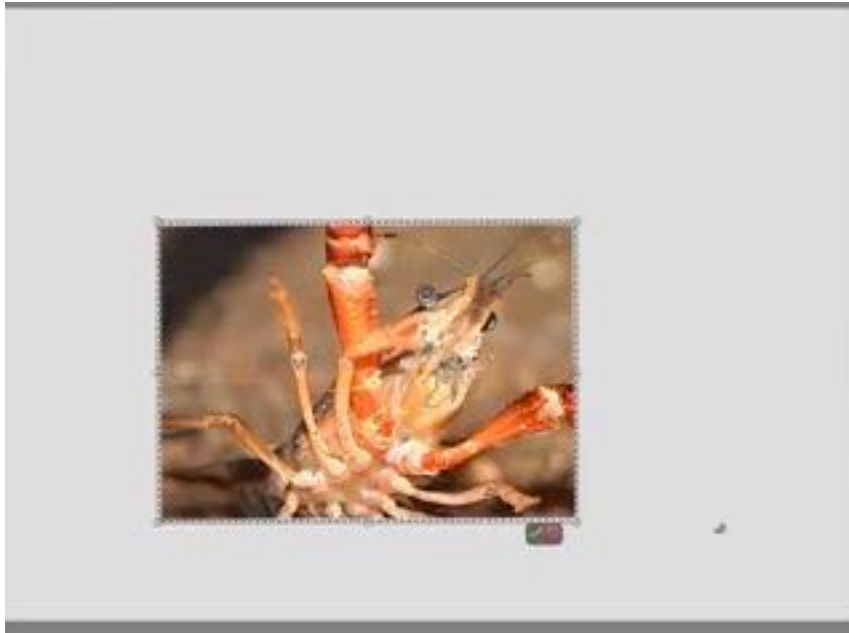

2.

3. Create a frame on your picture to set where the effect should be applied.

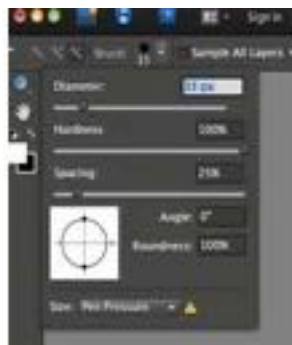

4.

5.

6.

7.

8. Select the areas.

9.

10. Apply a gradient to the background.

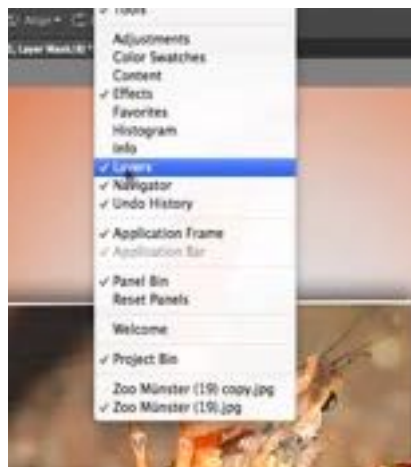

11.

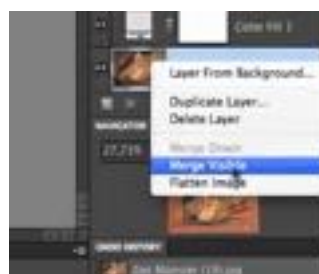

12.

13.

14. Merge all layers.

15.

16.

**You are done! You have created a so-called out of the bounds effect!**
