# Digital Scrapbooking Tutorial – Center your elements and backgrounds in Photoshop Elements

In this digital scrapbooking tutorial you learn how to center your elements and backgrounds in Photoshop Elements. Often you want your elements and photo in the center of the attention and this digital scrapbooking tutorial will help you to apply this knowledge not just to your scrapbooking layouts but also all the other things you want to be centered or aligned left or right on your layout.
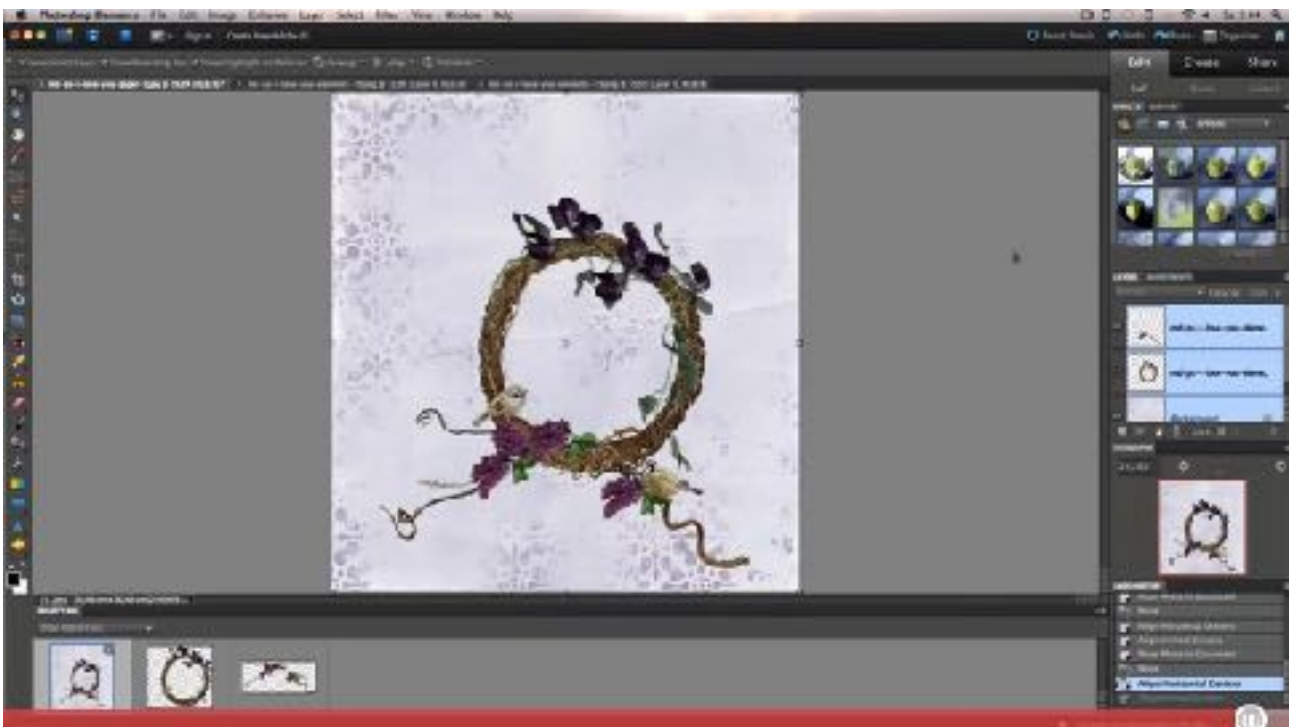

Prepare a background and the elements you want to use. Drag the elements onto the paper.

Click on the move tool, now make sure you marked both your layers, do that by clicking on them both while holding the CTRL (command) key.
Then click on arrange and click on horizontal centers. (see pic below), then on vertical centers and your element should be in the center of your page.

Now drag your next element onto our paper and place it where you like it. Then mark all the layers again and do the above steps once more to have to everything centered.
